\* Please provide a name or description for all C.O.M. fabrics

Notes:

**X Sign here**

This order is custom made and cannot be changed or canceled once goods are cut. • The workroom will take deductions on all inside mounts.

## Measuring

### Inside Mount:

Measure the exact width and height of the window opening. It is a good idea to check the inside width at the top, middle and bottom of the window. The factory will deduct 1/2" from the width for clearance on all shades ordered as Inside Mount.

### Outside Mount:

Measure the exact width and height of the area you want to cover. The shade should overlap the window opening or trim by at least 3" in width and height.

### Relaxed and London Shade Notes:

**Both the Relaxed Roman and the London Shades tend to "toe-in" noticeably at the bottom. Inside Mounts, 2-on-1's and 3-on-1's are not recommended.**

**The "height" of a Relaxed Roman and a London Shade is the short point of the "smile."**

## Care Instructions

### Steaming the Shade

Like every fabric treatment, a brand new Horizons window fashion right out of the box may have wrinkles.

Many of the wrinkles will simply hang out after a few days. However, for best results, we recommend steaming your shade once it is installed.

If a professional steamer is unavailable, a standard iron with a steam button will work just as well.

**Note: Use caution when steaming fabrics made from silk.**

Dry Clean Only.

## Soft Roller Shade Measuring

- Use a metal tape measure only.
- Round to the nearest 1/16".

### INSIDE MOUNT:

**Width:** Measure the exact width of the window opening at the top, where the brackets will be mounted. Be precise and round to the nearest 1/16th of an inch. The workroom will deduct 1/8" (from the tip-to-tip size) to allow for clearance.

### Important:

Due to the hardware requirements, there are significant light gaps at the edge of all roller shades. For spring roller shades, there is a 1/2" gap on each side and for clutch roller shades there is a 5/8" gap on each side. To avoid these light gaps, consider an Outside Mount.

**Height:** Measure the actual height of the window. The workroom will add fabric for roll up allowance.

### OUTSIDE MOUNT:

**Width:** Measure at the top of the window where the brackets will be placed.

For Outside Mount, order as "Cloth Measurement" and provide the total width the fabric should cover. A 1-1/2" to 2" overlap on each side is recommended to stop light gaps.

**Height:** Measure the actual height of the window. The workroom will add fabric for roll up allowance.

## Cleaning

We suggest periodic vacuuming with a soft brush attachment. Wet cleaning of any shade is highly discouraged, especially those with a cotton content.

## Freight Saver Shipping (Net Pricing)

Horizons Soft Treatments Shades are shipped at Freight Saver rates to all states in the continental U.S.A. These are NET rates. Rates are based on the width of the headrail.

The maximum charge is \$199 per order. Call customer service for shipping outside the Continental United States.
